

## **Capability Statement**

### ***History***

After overseas humanitarian career, consulting since 1996 on violence, disasters, poverty and programs responding to them. Major involvements include: Global Landmine Survey, and the rural poor in Bangladesh. Technical focus: Impact survey and program monitoring design, analysis and training. Publications.

### ***Philosophy***

- Evidence-based dialogues aid international solidarity, resource mobilization as well as staff motivation.
- Against highly stratified expertise systems, modest investments in local analytic capacity afford organizations of those impacted voice and inclusion at the policy table.
- NGO monitoring systems, normally a low-value instrument in the aid chain, can be made more productive to meet important evaluation functions.

### ***Substantive expertise***

- Local organizations of the poor, vulnerability, poverty reduction
- Disaster response and information management in responders
- Dynamics of violence

### ***Technical skills***

- Organizational analysis of NGO programs in the aid chain
- Analytical statistics and mid-level econometrics
- Monitoring systems, including analysis training with national staff
- Survey design and analysis
- Basic GIS
- Good photographer

### ***Mission parameters***

- Overseas missions up to two months
- MS Office and Project, STATA, GIS
- Field work and training in English and French
- Design and validation of survey protocols
- Scalable data management syllabus
- Technical writing
